

Stanislaus County
Public Safety Center Expansion – AB 900 Project
Possible Scope Change

The Project 1 240-bed additive alternate scheme provides 24 additional double-occupancy cells (48 additional beds) to each 192-maximum security housing unit. To accommodate the additional cells, each housing unit's three wings is lengthened by 14'. The scheme also creates additional space in the shared core/spine to be utilized as interview rooms serving the adjacent dayrooms.

The additive alternate scheme, in providing 240 beds in each of the two maximum security housing units, is combined with the 57 special use beds and the 15 beds in the Health Services unit for a grand total of 552 beds.

Project 1 & Project 3 Overall Composite Site Plan w/ 240 Max Housing Unit
