ACKNOWLEDGEMENTS

Many local juvenile corrections practitioners contributed to the successful curriculum revision project of 2007. The agencies they represent reflect the demographic diversity of California’s local juvenile detention systems operated by probation departments. Additionally, training providers, instructors and other subject matter experts gave valuable input during the revision process.

The Board of State and Community Corrections is extremely grateful to all those who volunteered their time and hard work in making this revision process successful. Their support and assistance, along with their agencies’ generous contribution of their time, enables California to maintain a comprehensive and current training program for entry-level juvenile corrections officers. Specifically, the Board of State and Community Corrections wishes to thank the following individuals who participated in this project.

INTRODUCTION

Purpose and Scope of This Manual

The primary purpose of this Core Training Manual is to present the core curriculum and design specifications for the Juvenile Corrections Officer Core Course. This information is essential for training providers for the presentation of the entry-level core course and to receive and maintain certification through the Standards and Training for Corrections (STC) Program, operated by the Board of State and Community Corrections. It is also of significant benefit to local probation departments in the training of new juvenile corrections officers.

Note: This manual can be downloaded from the Board of State and Community Corrections web site

The manual also provides a brief summary of how the curriculum was revised, assumptions underlying the development and revision of the curriculum and how the course specifications may be used to prepare course lectures, exercises, lesson plans, tests and materials. For more in-depth coverage of certification procedures, structure and core course delivery requirements, training providers are encouraged to thoroughly read STC’s Policy and Procedure Manual for Presenting Local Corrections Core Courses.

The Core Training Manual is divided into several sections.

Section A provides a description of the juvenile corrections officer job as performed by the majority of juvenile corrections officers who work in local juvenile detention facilities throughout the state. This section also includes an overview of the 2007 curriculum revision process and the assumptions guiding the process.

Section B presents a summary of the major changes to the curriculum. This includes changes to the content, structure, and emphasis compared to the year 2003 version. Modifications were made to the manual near the end of 2011. These modifications did not change any of the course content. Tables to assist in completing the RFC were added (Section E), as well as information concerning Unit 1 and supplemental course material (Section C). Additionally, more clarification was given to the three required testing methods (Section D & E), module titles were corrected in the course outline (Section C), and the five-day sample schedule replaced the 2007 sample course schedule (Section C).

Section C presents the current course outline, which includes time allocations for each module, Unit 1 and supplemental material expectations, and a five-day sample schedule that can be used as an example of what to include when completing the Request or Certification (RFC).

Section D presents the objectives and testing specifications for the course. These objectives are the fundamental building blocks of the curriculum. The objectives are the end goal and the basis for developing methods to evaluate instructional effectiveness.

Section E contains tables that identify the instructional objectives that are to be tested and the required method of testing for each (Job Knowledge Test (JKT), Behavior Skills Test (BST) or Written Skills Test (WST)).

Section F presents the full list of juvenile corrections officer core tasks – tasks, identified through a comprehensive, statewide job analysis, as important and commonly performed by the majority of local juvenile corrections officers statewide.
Supporting Documents

Two separate documents, entitled Knowledge/Skill Maps and Physical Tasks Training Manual accompany this Core Training Manual.

The Knowledge/Skill Maps contain valuable resource information about the core tasks, arranged in a format that groups related tasks. In addition to linking the knowledge/skill maps to the core tasks, each group of core tasks in the maps is described in terms of the value, prerequisites, principles, resources and steps of performing the core tasks. This information will assist providers and instructors when they develop their lesson plans and tests. A more complete explanation of how the maps relate to the course is contained in the introductory pages of the maps manual.

The Physical Tasks Training Manual describes the curriculum for instructing trainees on techniques and practice methods to perform the physically demanding tasks (running, lifting, etc.) and to support the trainee’s ability to perform the tasks specified in the Defensive Tactics and Restraint training outlined in the Core Training Manual. The Physical Tasks Training Manual includes a description of the four required work simulations tests. This manual is required reading for all physical conditioning and performance instructors who will be trainers in the Juvenile Corrections Officer Core Course.

Effective Date for Delivery of This Curriculum

The effective date for the prescribed curriculum detailed in this manual is July 1, 2007. However, STC training providers may begin delivering this curriculum prior to the effective date if the Board of State and Community Corrections has certified the course. Certification documents must be submitted to the STC Program sixty (60) days prior to the first delivery of the new curriculum.

Since virtually all of the course objectives, physical conditioning protocol, testing methodologies and knowledge/skill maps were evaluated and subsequently revised, training providers must also update their presentations, lesson plans, and Job Knowledge Test items to reflect these changes.

Technical Assistance

Please feel free to contact the Board of State and Community Corrections, STC Program, for any assistance needed in fulfilling the certification requirements, interpretation of materials and delivery methods. Core Instructor Development training is also available upon request.
SECTION A OVERVIEW

Description of the Juvenile Corrections Officer Job

The juvenile corrections officer job can differ from one county to another and from one assignment to another in the same jurisdiction. This training course relates to the activities or tasks performed by the majority of juvenile corrections officers throughout the state, regardless of the location, size, budget, etc., of the employing agency.

The description of this “core” job comes from two basic sources. First, the overall mission of the juvenile corrections officer job and its place in the California Criminal Justice System are established in state law. The second source of information about the core job comes from the statewide job analysis research conducted periodically by the STC Program.

Drawing upon each of these sources, the following describes the core job in terms of its:

(a) overall mission
(b) role and function in the California Criminal Justice System,
(c) major tasks and responsibilities, and,
(d) knowledge, skills and abilities.

Mission of the Juvenile Corrections Officer. The juvenile corrections officer has primary responsibility for the custody, supervision, treatment, and rehabilitation of persons accused of or adjudged responsible for criminal or delinquent conduct.

Role and Function of the Juvenile Corrections Officer. The role and function of the juvenile corrections officer is to ensure that those persons entrusted to his/her care are provided with a decent and humane environment, protected from those who would harm them, and prevented from harming themselves or others. A further role is to provide services and/or behavioral controls that would aid in the rehabilitation of the juvenile’s behavior whereby they may be permitted to return to the community.

Major Tasks and Responsibilities. The major tasks and responsibilities of the juvenile corrections officer job in juvenile detention facilities have been defined in the periodic statewide job analyses conducted by the Board of State and Community Corrections. The primary data gathering instruments in the job analysis included the following:

- on-site observations
- focus groups of juvenile corrections officers and immediate supervisors
- structured questionnaires about tasks, knowledge, skills and abilities

Highlights of this job analysis research are presented below. For a more detailed report on the research, please refer to STC documents describing the study.

All core tasks identified in the research are listed in this manual in Section F. Contained below is a summary of the content of the core job.

Supervising Juveniles

Monitoring, directing and controlling the activity of juveniles during daily care, recreation, work details, and activities inside and outside the facility. Maintaining appropriate close supervision and security over juveniles to prevent self-injuries, accidents, fights, escapes, and other negative incidents. Enforcing rules and disciplinary actions when appropriate. Adhering to appropriate security procedures when escorting juveniles.
Searching and Maintaining Security

Conducting searches, inspections, and counts (of juveniles, visitors, mail, facility, etc.) with thoroughness and accuracy, in a timely manner. Initiating special searches when appropriate. Verifying information and identities, securing evidence, and making security checks.

Investigating and Detecting Problems

Investigating suspicious activities, incidents, and situations. Identifying illegal activity and potentially dangerous conditions (e.g., contraband possession/use, gang conflict, etc.). Taking appropriate steps to prevent problems before they occur. Recognizing signs of health problems, suicide risk, assaults, etc., and taking appropriate action to protect the well-being of juveniles.

Analyzing and Making Recommendations

Evaluating juvenile records and behavior and making recommendations about their detention, activities, care, and treatment. Planning and organizing activities and transportation for juveniles.

Report Writing

Writing reports (e.g., incident, evaluation, disciplinary, escape, use of force), correspondence, and other narrative reports that are clear, complete, accurate, and concise. Writing reports in a timely manner.

Record Keeping

Accurately completing forms, logs, and inventories necessary for the correct and efficient intake, receiving, and releasing of juveniles, operation of a facility, and daily custody of juveniles.

Handling Emergencies

Working effectively and taking appropriate actions in emergency or crisis situations (e.g., injuries, suicide attempts, fires, escapes, rioting, physical fights between juveniles or attacks upon staff). Using sound judgment and following proper procedures in using physical force or restraints, sounding and responding to alarms, enlisting and providing appropriate assistance. Rending appropriate first aid. This includes demonstrated performance in job simulation exercises and drills. Note: The focus of this work activity is on judgment and following procedures. Physical ability is not included here (it is described later in a separate work activity).

Counseling

Conducting individual and group counseling. Developing treatment plans and goals, and evaluating progress. Providing “on-the-spot” counseling (crisis intervention). Coaching and encouraging juveniles in volunteer activities and schoolwork; assisting with emotionally distressed, withdrawn, or self-destructive juveniles. Obtaining medical or psychiatric help for juvenile when needed.

Interacting/Communicating with Juveniles

Explaining rules, policies, expectations, and consequences to juveniles. Listening and responding appropriately to juveniles’ questions, concerns, complaints, and requests and providing appropriate assistance in working on problems. Respecting juvenile’s feelings, rights, and privileges and gaining their cooperation and respect.
Interacting/Communicating with People External to Staff

Conferring with the public and personnel external to the agency. Establishing cooperative relations with community, agencies, and other people external to the staff. Responding to inquiries from regulatory agencies, commissions, and the courts.

Working with Internal Staff

Working cooperatively and efficiently with co-workers, supervisors, and other internal staff. Following directions and providing assistance, coaching, and support when needed. Keeping staff completely informed regarding juvenile’s status, potential problems, and shift information.

Performing Physically Demanding Work

Working with physical skill sufficient to handle emergency situations such as medical emergencies, defending oneself, and pursuing, disarming, subduing and restraining juveniles. This includes demonstrated performance in job simulation exercises and drill.

Overview of the Curriculum Revision Process

The 2007 revision of the Juvenile Corrections Officer Core Course included input from many experts in the field of juvenile corrections including incumbents, supervisors, administrators, training providers, instructors, subject matter experts and specialists.

The core course initial design and subsequent revisions follow this sequence:

1) Core tasks applicable to the majority of juvenile corrections officers statewide are identified through a job analysis.
2) Core tasks are grouped into related clusters of tasks.
3) Clusters of core tasks are analyzed to determine what knowledge and skills are necessary to perform these tasks. This analysis generates a knowledge/skill “map”. Each map specifies the value, prerequisites, resources, principles, and steps required to perform the related tasks.
4) Instructional objectives are generated from the maps.
5) Testing specifications are determined for each instructional objective.
6) Instructional objectives are arranged into units and subunits (called modules) of instruction.
7) Time allocations are determined for each unit and module.
8) Units and modules are arranged in a building block sequence.
The following graphic illustrates the course design process:

**Assumptions Guiding Development of the Course**

The design of this training involved a series of decisions, many of which were critical to producing an effective instructional program. For example, the designers made difficult decisions regarding the inclusion or exclusion of specific content in the training course. While such decisions were often complex and difficult, basic assumptions and principles guided the development of the course. These assumptions and principles are presented below.

**Assumption #1: The content of the training must be job-related.**

This assumption refers all decisions on training content, methods, and format back to the actual demands of the juvenile corrections officer job. Knowledge or skills that are not essential to job performance are not included in the training course.

**Assumption #2: The training course should specify the trained needed by “entry-level” juvenile corrections officers who have no prior training or experience in juvenile corrections.**

This assumption identifies “entry-level” juvenile corrections officers as the target audience for the core training. The training needs of experienced juvenile corrections officers are not covered by this course. Although some entry-level juvenile corrections officers may have some background in juvenile corrections, the assumption of no prior training or experience ensures that the core training course will cover the needs of all entry-level personnel, even those with no background at all.

**Assumption #3: The training course should specify only those knowledge and skills that are essential for the newly hired juvenile corrections officer to meet minimum performance standards for entry-level personnel and to obtain maximum benefit from subsequent on-the-job training and experience.**

The core training course should not be expected to produce an experienced juvenile corrections officer capable of handling every job assignment. Rather, the core training course provides the trainee with the basic concepts and skills necessary to make sense of the job and to accelerate the learning process.
Assumption #4: Trainees will complete the entire core training course prior to their first actual work assignment.

Since trainees are assumed to have no prior background in juvenile corrections, the core training course should be completed before trainees begin to accumulate experience on the job. Trainees should complete the core training course prior to their first work assignment because this will allow them to efficiently learn from their on-the-job experience and achieve proficiency as soon as possible.

Assumption #5: Priority for core training course content is given to those skills and topics that are not easily learned on the job and do not vary significantly from agency to agency. Preference is given to those areas that are most complex, require practice and best mastered away from the day-to-day demands at the job setting.

The focus of the core training is on major areas of knowledge and skill development most conducive to a classroom and practice area setting. Typical areas include report writing, defensive tactics, communication skills, ethics, etc., rather than particular forms and procedures that can easily be covered on the job.

Assumption #6: The core training course should be administratively feasible and efficient.

To enable every training provider to operate within certain administrative constraints (e.g., time, budget, personnel, etc.), the course is designed with the following considerations:

**Daily Schedule:** Daily course schedules are designed to be 8 hours per day, 5 days per training week.

**Testing Periods and Methods**

- The Job Knowledge Tests (JKTs) are multiple choice paper and pencil tests. The multiple choice test format is the preferred testing methodology for measuring knowledge-based objectives because of its proven value in measuring different types of learning and its low cost.

- The Written Skills Tests (WST) and Behavior Skills Tests (BST) are to be administered by the designated instructor during the actual training delivery. WSTs are designed to be graded by the instructor during non-instructional time.

**Instructional Methods**

The traditional classroom training model is the preferred training delivery format for much of the curriculum. This allows for a variety of delivery methods (lecture, class discussion, case study, and role-playing) along with the use of supportive multi-media technology.

It is strongly recommended that adult learning methods guide the delivery of this course and that trainee participation is encouraged where appropriate. When developing their lesson plans, instructors are encouraged to seek opportunities to engage the trainees in hands-on application of the material and to limit the amount of time spent in the lecture format. This will necessitate more instructor planning time “up front” before delivery of the training, but less instructor “on stage” time during the presentation.

Please refer to the **Policy and Procedure Manual for Presenting Local Corrections Core Courses**, specifically the section “Choosing Effective Training”. Technical assistance in training design and presentation is also available from the Board of State and Community Corrections.
SECTION B  SUMMARY OF CHANGES TO THE CURRICULUM

The curriculum underwent a comprehensive revision process that resulted in a number of significant changes to both the content and the structure of the course. Presented below are highlights of the major changes.

Content Changes

Professionalism and Ethics

This new 4-hour unit (#3) focuses specifically on ethical and professional issues related to a juvenile corrections officer environment. The structure of the unit allows for ample time to discuss the nuances of this topic and to explore various types of situations. The structure also allows time to examine ways to deal with problematic behavior.

Report Writing

Eleven hours of additional time was added to this unit (now Unit #6) changing the total hours from 8 hours to 19 hours. Further, this unit was extensively rewritten. It mirrors the Report Writing curriculum of the Adult Corrections Officer Core Course – a model used successfully for the past four years. The new curriculum emphasizes organization and essential content versus mechanical aspects (spelling, grammar, etc.). There is significant time included in this unit for the trainee to practice writing and to obtain feedback. The new curriculum is designed to be presented in several segments throughout the course to allow the trainee time to absorb the material.

Communication Skills

This unit (now Unit #12) was completely overhauled. It is based on a successful model geared toward equipping non-clinical staff with effective communication and intervention skills for troubled youth. Two modules of the unit focus specifically on communicating with depressed or suicidal juveniles and crisis intervention. The total hours for the communications unit are now 19, up from 9.5 hours.

Fire and Life Safety

A seven-hour module was added to the Handling Emergencies unit (now Unit #14). This new content includes specific instruction on inspecting for and maintaining fire safety in a juvenile detention facility as well as instruction on detection and control of fire.

Defensive Tactics and Restraint Techniques

This unit (now Unit #8) expanded significantly from a previous 12 hours to a revised 30 hours. Because the skills required for defensive tactics are physically demanding and rely on repetition and drill, this new curriculum is designed to be presented in several segments throughout the course. The instructional objectives were written with sufficient flexibility to allow a variety of approaches yet maintain the continuity of handling basic situations applicable to different facilities statewide. The design calls for a limited number of techniques with adequate time for the trainee to develop competency in these new skills.

Physical Conditioning and Task Training

This unit (now Unit #17) also changed significantly in both specifications and time (up from 12 to 17.5 hours). The updated curriculum includes preparation for successfully performing the work simulation tests (dummy drag, dummy lift, agility run and sprint) as well as updated protocol for improving performance on other demanding tasks, especially Defensive Tactics. The revised curriculum includes a self-assessment, updated exercises based on the latest exercise science research and the development of an on-going plan for each trainee to improve his or her abilities to perform the physical tasks of the job.
CPR and First Aid

The CPR and First Aid requirement is eliminated from the statewide core course, allowing agencies to satisfy this requirement at the local level. Despite the elimination of CPR and First Aid (FA) from the core course, all entry-level juvenile corrections officers must successfully complete CPR and First Aid courses within the first year of employment as a juvenile corrections officer.

Structural Changes

Total Course Hours

As noted above, the minimum total course hours has been increased from 134 hours to 160 hours. The effective date for required presentation of this expanded course is July 1, 2007.

Administrative Time Added

Three hours of administrative time was created in the course curriculum to allow for such activities as orientation, classroom review of the Job Knowledge Tests, recapping of information to provide continuity from one instructor to another, and handling logistical aspects of the course such as clothing changes for Defensive Tactics and Physical Conditioning.

Instructional Objectives Specificity

The number of instructional objectives increased from 214 to 390. This increase is due partly to the expansion of course hours and partly to provide instructors with enhanced guidance.

Testing Time

The time allocated for administration of the Job Knowledge Tests was decreased by 30 minutes from 3.5 hours to 3 hours. This reflects the shift in emphasis from the lecture methodology to adult learning theory.

Job Knowledge Test Items

The total minimum number of required test items specified for the revised curriculum has been reduced from 416 to 302 items.

Written Skills Tests

The total number of WSTs required in the revised curriculum was also reduced from 27 to 8.

Behavior Skills Tests

The number of BSTs increased significantly from 13 to 39. This increase also reflects the emphasis on practice and hands-on participation.

Instructional Objective Verbs

Several trainee behavior descriptions (verbs) called for in the instructional objectives were modified to guide instructors toward adult learning methodologies that encourage trainee participation. For example, the verb “identify” in several of the objectives was changed to a verb such as “explain”, “describe”, “discuss”, “examine”, etc.

Instructional Objective by Task and Knowledge Skill Map Index

The index linking instructional objectives to tasks and the index for knowledge skill maps are now contained in the Knowledge Skill Map Manual.
Unit and Module Numbering System

Unlike previous versions of the Juvenile Corrections Officer Core Course, the 2007 version is designed to be presented in modules that do not necessarily stay within a discrete unit. For example: because medical and mental health issues affect classification decisions, Modules 5.3 and 5.4 covering those topics are inserted just before the module on classification (Unit 9, Module 9.3). Formal Reporting in the Communication Skills Unit is integrated with Module 15.2, Testifying in Court. Therefore, providers are encouraged to structure their presentations according to subject matter, rather than the unit and module numbering system.

Repetition by Design

The course affords several opportunities for the trainee to practice and drill on various subjects throughout the course. In particular, communication skills, defensive tactics, report writing and medical/mental health issues are addressed in many units and modules. Providers should make sure this design is communicated to the various instructors so that it is clear to the trainees that this repetition is by design and is intended to facilitate their learning.

Emphasis

As reflected in the revisions to instructional objectives and testing protocol, training providers are encouraged, and in some cases, required, to increase trainee participation and practice. This revised emphasis should offer trainees a more engaging core training experience consistent with adult learning styles and be more conducive to retention and mastery.

2011 Modifications

The modifications made to this manual did not change any of the course content. Sections added or modified in the manual were:

- tables to assist in completing the RFC (Section E).
- information on Unit 1 and supplemental course material (Section C).
- clarification on the three required testing methods (Section D & E).
- corrected module titles in the course outline (Section C).
- the five-day sample schedule replaced the 2007 sample course schedule (Section C).
- notation of JKT items was modified throughout the manual.
- information concerning 48-hour breaks in between modules in Unit 8 and Unit 17.
SECTION C CORE TRAINING COURSE OUTLINE AND UNIT SCHEDULE – 160 HOURS

Certified CPR and First Aid courses must also be completed
Agency Specific Training Interventions (Optional)

Agencies that wish to add instructional content to the course that is not included in the instructional objectives will need to note it properly in the RFC. Outlined below are the two ways in which agencies should properly note the material in the RFC. The two types of additive course content are Unit 1 Agency Specific Training and Supplemental Material.

Unit 1.0 (Agency Specific Training)

This unit may be used by the agency or provider for the presentation of subject matter that meets a specific need for the target trainees, such as agency-specific policies and procedures, special issues, and additional content beyond the core course prescribed instructional objectives. The provider will need to develop measurable performance objectives for the agency-specific material to secure STC certification of the subject matter. Time devoted to Unit 1 material is in addition to the minimum 160 hours prescribed in the Juvenile Corrections Officer Core Course.

Agency Specific Training material might include but is not limited to instruction in the following areas: court consent decrees, sexual harassment, transitioning into a new jail, or OC spray use. Performance objectives must be written for each agency specific module.

Performance Objectives are similar to the objectives listed in the body of this manual. The provider or agency is required to provide objectives for any agency specific content that has been added to the course. Use the example below when writing objectives for Unit 1 material.

Example notation of agency specific content and performance objectives in RFC:

Module 1.1.1 OC Spray Use

SECTION D INSTRUCTIONAL OBJECTIVES AND DESIGN SPECIFICATIONS

This section presents the instructional objectives for each module that make up each unit of instruction. The instructional objectives are written as measurable statements that describe expected learning outcomes to be achieved and demonstrated by a trainee upon completion of the core training course.

The instructional time assigned to the units and modules is presented in “dedicated” time frames. The instructional time is the minimum amount of time for the topic. Training providers are encouraged to exceed these minimums and may request approval for certification of these increased time allocations.

For each objective that is to be measured on a JKT, the minimum number of questions (referred to as items) will be listed after the objective. For example, an objective followed with “JKT 2 Items” must be assessed with two questions on a JKT. Usually one half-minute is given per test question. In most cases, the instructors should develop the test items because they will be able to link the items most accurately to the lesson plans. The STC Program does not maintain a test item bank but is available for assistance in constructing test items.

These JKTs should not be confused with the performance tests, WSTs and BSTs. These two types of performance tests occur as part of the instructor's presentation. The specifications for the WSTs and the BSTs are contained within the corresponding instructional objective.

A note about Physical Tasks and Conditioning (Unit 17) and Defensive Tactics (Unit 8):

A minimum of 48 hours is required between segments of physical conditioning and defensive tactics training that is physically challenging in order to minimize the risk of injury and to allow adequate time for students to assimilate skills. For any course instruction day that includes physically challenging training, the following course instruction day can include physical activity, if that physical activity is not strenuous or challenging. Defensive tactics modules (8.2, 8.3, 8.4, 8.5, and 8.6) should preferably be presented in blocks of instruction no greater than four (4) hours and physical conditioning (Unit 17) in blocks of two (2) hours. Instructors may also present (2) hours of physical conditioning and (2) hours of defensive tactics in one day of instruction.

The Policy and Procedure Manual for Presenting Local Corrections Core Courses and other Board of State and Community Corrections publications provide additional information on lesson plan development, test item writing, and procedures for presenting the curriculum.

Dummy Lift

For 30 seconds, support the weight of a hanging 150-pound bag or dummy so that all stress is taken off the rope or chain from which it is suspended.

With knees bent, wrap arms around the 150-pound bag or dummy. Get a firm hold, and then straighten legs to lift the bag or dummy high enough to create slack in the rope/chain.
**Weighted agility run**

Walk briskly or jog through a 150-foot zigzag barrier course consisting of three sharp turns. Pick up a 20-pound fire extinguisher or weighted tube bag at the 75-foot mark and carry it back through the course. Complete the full course within 30 seconds.
EXPLANATION OF PLYOMETRIC Exercises

Dummy drag

Drag a 150-pound bag or dummy for a distance of 20 feet within 30 seconds.

Wrap arms around the dummy under the arms. Extend the legs while maintaining a straight back. Now walk backward with the dummy elevated to not interfere with the knees until the required distance is completed.

Arm Circles

Standing with arms out, slowly move hands in a circle, gradually increasing the size of the circle. Increase to full arm circles for 10 complete circles. Repeat in opposite direction.
**Side Bends**

With feet more than shoulder width apart, bend sideways as far as possible. Return to upright position then bend sideways again, 2 to 3 times on each side.

**Windmills**

Stand erect, feet shoulder width apart, arms out to the side. Keeping the legs straight, bring right hand across the body reaching for the left foot. Return to starting position and reach for right foot with the left hand. Repeat the full cycle 10-20 repetitions.
**Trunk Twists**

Standing, twist gently from right to left and reverse. Hands can be outstretched or in front with elbows bent. Perform 8 times per side.

**Stomach Flutter Kicks**

Lie on stomach with hands under the thighs. Keeping the legs straight, flutter feet alternately 7 times.

**Knee-to-Forehead**

With hands and knees on the floor, bring one knee toward the forehead (flexing the neck), then straighten the leg back as far as possible. Perform 5-7 leg extensions before switching to the other leg.
**Push-ups (modified)**

On the stomach with body straight from shoulder to knees and hands beside the shoulders, push the body upward until arms are straight. Bend arms to lower body back to the starting position. In the modified movement, weight is supported at the knees.

![Push-ups (modified)](image1)

**Push-ups (military)**

On the stomach with body straight from the shoulders to the toes, hands beside the shoulders, push the body upward until arms are straight. Bend arms to lower the body back to the starting position.

![Push-ups (military)](image2)

**Sit-ups**

Start on the back, knees bent at a 90-degree angle with hands behind the head. Raise the head and upper part of the body, curling up from the waist. Perform 10-20 reps.

![Sit-ups](image3)
Side Leg Raises

While on the side with legs straight, slowly raise the top leg 18" and return. After 10 leg raises, roll to the opposite side and repeat with the other leg. Perform 10-20 reps per leg.

Prone Planks

Start in the prone position and prop the body up onto the toes and forearms. Hold this position with the body maintaining a flat back and rigid position for the prescribed amount of time.

Right & Left Side Hover

Lying on the side, elevate the body off of the ground so that it is supported by the side of the foot and the elbow. Maintain the body in a straight, rigid position for the prescribed amount of time.
Skipping

Begin in the standing position and skip from right to left foot. A strenuous effort is not required when completing these. Be sure to follow the prescribed number of touches and recovery duration.

Skipping-for-Height

Complete skipping from right to left foot as described above. Be sure to use an exaggerated arm movement and try to come as far off of the ground as possible. Be sure to follow the prescribed number of touches and the recovery duration.
**Wrist Curls**

Selecting a weight of “somewhat hard”, take a kneeling position with the arm supported by the leg. Curl the weight up with hand palm side up. Perform the prescribed number of repetitions.

![Wrist Curls](image1)

**Arm Curls**

Selecting a weight of “somewhat hard”, raise weight from the extended position and then lower it back down slowly. Keep back straight and knees slightly bent. Do not hold breath during the movement. Perform the prescribed number of repetitions.

![Arm Curls](image2)
**Leg Press**

Selecting a weight of “somewhat hard”, start in a press position and extend leg until nearly straight. Do not lock out the knees. Return leg to the start position slowly. Perform the prescribed number of repetitions.

![Leg Press](image1)

**Modified Wall Sit**

Partners sit facing opposite directions, back-to-back, with arms hooked at elbows, backs erect, and knees bent at right angles. Partners then perform a simultaneous backward push and standing effort, rising to a half knee bend and holding position for 30-40 seconds. Perform the prescribed number of repetitions.

![Modified Wall Sit](image2)
**Calf Stretch**

Facing the wall, put feet together about 36” from the wall, and place hands on the wall. Keep feet flat on the floor and knees straight. Start at 3 sets for 5 seconds and work up to 3 sets for 15 seconds over the course of the program.

![Calf Stretch Image](image)

**Quad Stretch**

While standing and supporting the body with one hand on a wall or other support, grab the ankle and arch the back. Pull up on the ankle until adequate stretch is felt in the front thigh.

![Quad Stretch Image](image)
Knee Hugs

Lying on back, slowly raise knee to chest, grasp knee with both hands, and pull to the chest. Keep opposite leg straight. Hold leg for three seconds, then follow same procedure with other leg, again keeping opposite leg straight. Alternate six times.

Stride Stretches

Start in a push-up position with one knee tucked forward to chest level and the other leg extended. Alternate forward and extend legs. Start at 3 sets of 5 repetitions and work up to 3 sets of 15 repetitions over the course of the program.
Two-Foot Hops

Start in the standing position, flex the knee slightly and hop into the air. Hopping should be done in place. Continue hopping in place for the recommended number of hops in the set.

Single Foot Side-to-Side Hop

Begin by standing on one foot and flex the knee slightly hopping to the side landing on the opposite foot. After landing on the opposite side, flex the knee and hop back to the other side. Continue hoping back and forth for the recommended number in the set. Distance between hops should be about three feet.

Two Foot Side-to-Side Hop

Start in the standing position with the feet approximately shoulder width apart. Flex the knee slightly and hop to the side. After landing on the opposite side, again flex the knee and hop to other side. Continue hopping from side to side for the recommended number in the set. Maintain feet at approximately shoulders width apart. Distance between hops should be about two feet.
**Standing Long Jumps**

Start in the standing position and flex the knees deeply while swinging the arms back. Now jump forward as far as possible. Repeat this action for the recommended number of repetitions in the set. A soft landing area (padding or sand) is highly recommended for this exercise. If none is available then the exercise may need to be avoided.

**Standing Jump/Reach**

Start in the standing position with feet shoulders width apart. Flex the knees and jump into the air as high as possible. Raise the arms above the head as if trying to reach for something in the air. Repeat this exercise for the recommended number of repetitions in the set.
Standing Jump Over Barrier

Start in the standing position with feet approximately shoulder width apart. Flex the knees and jump up and forward over a barrier (cone or small cross rail). The barrier should not exceed one and a half feet in height. If no barrier is available then jump over an imaginary barrier.

Hexagon Drill

Begin by standing with approximately six feet of space around each person. Next envision standing in the middle of a clock face. Now flex the knee and jump forward to the 12 o’clock position and then jump back to the starting position. Repeat this exercise jumping to the 2, 4, 6, 8, and 10 o’clock positions. Hexagon drill pattern: Distance between start and each jump can vary based on fitness and body size, but should be far enough out to provide reasonable effort. Also order of the jumps can be varied so long as all of the jumps are consecutive.
**Multi Jump for Height**

Begin standing in place. Next flex the knees and jump into the air as high as possible. As soon as landing, flex the knees and jump into air again as high as possible. Repeat for the recommended number of repetitions.

No picture.

**Wheelbarrow**

Begin in the push-up position. Have a partner pick up the persons feet, while they remain supported by their arms. Now both partners will walk forward for the recommended number of steps.

*Note: It is a good idea to match partners based on body size to avoid injury.*

![Wheelbarrow Image]

**Explosive Wall Push-ups**

Begin standing on the floor facing a wall. Lean forward into the wall with arms extended (similar to the push-up position). Flex the elbows and lower the body toward the wall. Now rapidly contract the arms with enough force to push off of the wall. Fall back into the wall and repeat the motion for the number of recommended repetitions.

![Explosive Wall Push-ups Image]
**Push-Up Jump**

Begin in the push-up position on the floor. Lower the body to the floor. Now explosively contract the arms with enough force to push off the ground. Now land on the floor and lower the body back to ground and repeat for the recommended number of repetitions. Rest 2 seconds between each push-up.

No picture.

**Alternative Upper Body Plyos**

**Overhead throw w/med ball or basketball**

Begin in the standing position and raise the ball over head. Next throw the ball over the head toward a partner. The partner will catch the ball and now perform the same motion. Partners will pass the ball back and forth until the indicated number of repetitions is completed.

**Supine single arm overhead throw w/med ball or basketball**

Begin by lying on the ground with one arm extended overhead with the ball in hand. Throw the ball forward and begin flexing the trunk upward similar to a stomach curl. Finish in a stomach curl position. Repeat the recommended number of repetitions.
Chest pass w/med ball or basketball

Begin in either the standing or kneeling position. Holding the ball in two hands, bring the ball to the chest and push out, passing the ball to a partner. The partner should be ready to receive the pass with their arms extended out in front of them. As the partner receives the pass they should slow the ball down as they bring it to their chest and then immediately pass the ball back to the opposing partner. Pass the ball back and forth until the recommended number of repetitions has been completed.

Chest push w/med ball or basketball

Begin on the knees holding ball close to the chest as if a chest pass was going to be completed. Next crouch down. From the crouch position explode outward staying on the knees and throw the ball as far as possible or to a partner. Have the partner return the ball and repeat for the recommended number of repetitions.
**Heavy bag thrust**

Begin by standing next to a suspended heavy bag with right shoulder lined up with the bag. Move the right foot back while the left foot stays next to the heavy bag for stability. Place the right hand on the heavy bag and use the arm and torso to push the bag forward. As the bag comes swinging back, have the exerciser and a partner slow the bag down and then repeat for the recommended number repetitions.

**Heavy bag stroke (Advanced)**

Follow the same procedure for the heavy bag thrust, however, when the heavy bag comes swinging back have exerciser catch the bag and begin to slow it down. As the bag swings back even with the body, immediately push it forward with an explosive motion. Repeat this sequence for the recommended number of repetitions.
Catch and Overhead Throw w/med ball (Advanced)

Begin in the standing position with feet shoulder width apart and arms extended out and slightly over head. Have a partner pass the ball. Catch the ball overhead and pass it back to the partner. Repeat until the recommended number of repetitions has been completed.

*Note: If a partner is not available, exerciser may throw ball against a wall and catch the rebounding ball.
SECTION E. TESTING INSTRUCTIONAL OBJECTIVES

The Testing by Module Table presents the linkage of instructional objectives to specific Job JKTs, WSTs, and BSTs. With the information provided for each objective in Section D of this manual, the Testing by Module Table creates a framework for constructing tests to be used in the course. Following the Testing by Module Table are three Minimum JKT item tables, which display the JKT Items by unit, module, and objective. For JKTs, allow one-half minute for each test item.

Please refer to the Policy and Procedure Manual for Presenting Local Corrections Core Courses for more detail on test administration and scoring. The publication Test Item Writing for Core Courses is also available from the STC Program, as well as technical assistance.

Defensive tactics and physical conditioning modules should preferably be presented in blocks of instruction no greater than four (4) hours and two (2) hours, respectively. When scheduling defensive tactics and physical conditioning modules containing high physical demands, the abilities and physical characteristics of students should be considered. The goal of the course is to impart skills, which cannot be done if students are physically worn out.

*A minimum of 48 hours is required between physical conditioning and defensive tactics training that is physically challenging, in order to minimize the risk of injury and to allow adequate time for students to assimilate skills. For any course instruction day that includes physically challenging training, the following course instruction day can include physical activity, as long as that physical activity is not strenuous or challenging.

STANDARDS AND TRAINING FOR CORRECTIONS

LESSON PLAN POLICY (EFFECTIVE JULY 1, 2013)

STC-Request for Certification (RFC) courses (annual and core) must have a written lesson plan. A copy of the lesson plans must be made available to the STC Field Representative upon request.

Best practices indicate detailed lesson plans enhance the development and delivery of training. Lesson plans help ensure quality training delivery by providing detailed information about the delivery of instructional objectives, instructional methodology, testing, and classroom activities. Furthermore, lesson plans provide written documentation of training.

Components of a Lesson Plan

STC does not require a standardized format; however, the lesson plan must be in such detail that a substitute instructor with requisite knowledge of the subject could teach from the lesson plan without contacting the instructor for clarification.

Along with the approved RFC, all STC-RFC lesson plans must contain the following components:

Room Set-Up:

How the classroom needs to be set up (e.g., classroom style, small group, theater, etc.).

Instructor Material(s)/Equipment Needed:

All material and equipment needed, including handouts and reference material for the class or module.

Time for Each Section or Exercise/Activity:

The beginning and end time or amount of time needed for each exercise/activity, section, or topic.

Trainer’s Speaking Notes:

Any notes to remind the trainer of anything pertinent in that section. This may include key concepts, targeted responses, activity instructions, etc. It is not necessary to capture everything the instructor will say, for example, stories drawn from the instructor’s own experience to illustrate or underscore a key concept would not necessarily be included. This should be written to a level that a person that is familiar with the content and course could step in and complete the training.

Handout/Classroom Materials:

The distribution of handouts and classroom materials should be noted in the section of the lesson plans where the distribution occurs.

Testing Type and Description of BST/WST completion (if applicable):

The type of test(s) to be given in the class or module; i.e., Multiple Choice Test (MCT), Job Knowledge Test (JKT), Behavior Skills Test (BST), and Written Skills Test (WST). Describe in writing each BST and WST to be completed in the class or module. This can be attached to the lesson plan as a handout and labeled appropriately as to when to administer it.

STANDARDS AND TRAINING FOR CORRECTIONS

TEST ADMINISTRATION POLICY (EFFECTIVE JULY 1, 2013)

Core providers must have written policies and procedures for exam administration. Successful completion of core, including the exams, is part of the selection process. Because the exams are used to measure successful completion of core, the purpose of exam policies and procedures is to ensure fair and equitable testing. No examinee should have an advantage or disadvantage of any kind. Following standardized policies and procedures helps ensure that each examinee is provided with a guarantee of fair testing and an equal opportunity to maximize exam performance. This policy must be available for review by STC staff upon request.

The components identified below must be addressed in core providers’ policies and procedures for testing.

I. Exam Administration Staff
   a. Qualifications (e.g., position, classification)
   b. Training requirements (initial and periodic refresher training)
   c. Responsibilities

II. Exam Administration Procedures
   a. Exam room environmental characteristics (e.g., good lighting, comfortable temperature, adequate ventilation, freedom from noise and interruption)
   b. Exam room preparation (e.g., working clock, remove materials on walls that may provide information to examinees, arrange seating with a minimum space distance, post any required information)
   c. Staff requirements for number of examinees (e.g., exam supervisor and a proctor for 1 - 20 examinees, an additional proctor for each additional 20 examinees).
   d. Accommodations for documented disabilities in accordance with the Americans with Disabilities Act (ADA) allowed in the exam room
      i. Accommodations that can be handled with a regular exam administration (e.g. use of magnifier)
      ii. Accommodations that require a special exam administration (e.g. extended testing time, reader)
   e. Admitting examinees into the exam room
   f. Review and remind examinees of “code of ethics” (responsible for confidentiality and security of the exam)
   g. Administering the exam – follow proctoring scripts
   h. Distributing exam materials
   i. Timing and break policies
   j. Collection and return of secure exam materials

III. Test Security
   a. All exam (JKTs, MCTs, test scenarios) materials must be stored in locked location at all times unless being administered
   b. Limited access to exam materials
   c. Test security agreement signed annually by all exam staff
   d. Test questions should never be brought into the classroom unless being administered

IV. Maintaining Security in the Exam Room/Proctor Responsibilities
   a. Accounting for test materials
   b. Conducting the test (remain vigilant and do not engage in activities that are not exam related)
   c. Monitor equipment use
V. Procedures for Reporting and Handling Test Irregularities and Compromises
   a. Test irregularities
      i. Misconduct or inappropriate behavior of examinees
      ii. Test question error or ambiguities
      iii. Student complaints
      iv. Other incidents or disturbances (e.g., uncontrollable events such as fire alarms, power outage)
   b. Compromises
      i. Test is lost or stolen
      ii. Unauthorized access to a test
      iii. Examinee copies from another examinee
      iv. Individual attempts to impersonate and take a test for an examinee
      v. Examiners and examinees share information about an exam
      vi. Examinee receives answers to questions before the test
   c. Investigating compromises
   d. Consequences of a security breach
      i. Agency
      ii. Examiners
      iii. Examinees

VI. Accommodated Test Administration
   a. Requests for accommodations
   b. Required documentation for disabilities

VII. Document Retention Policies
   a. Test materials that should be retained in a secure location
   b. Retention schedule for test materials (abide by record retention policy of your agency)

VIII. Emergency Plan
   a. Identify staff responsible for managing an emergency
   b. List emergency supplies available in the exam room
   c. Identify alternative exam rooms and secure transportation of tests
   d. Detailed plans for how to handle specific emergencies (e.g., violence, natural disasters, illness, hazardous waste, bomb threat)

IX. Test Development
   a. Instructors develop own test questions
   b. Write at least two test questions for each performance objective; one for test and one for remedial test. Best practice would be one additional question in case there are problems with the other two
   c. Review, evaluate (Are the items functioning?) and revise tests regularly
   d. Test development oversight by training coordinator

X. Remediation

The provider testing policy will identify how many times a trainee will be remediated in cases were he or she does not pass the Job Knowledge Test (JKT), Multiple Choice Test (MCT), Written Skills Test (WST), Behavior Skills Test (BST). To successfully complete the course, each trainee must pass all tests.

The policy will minimally include:
   a. What is the provider’s cut-off score for each test? This does not include WST or BST, which are pass/fail only.
   b. Procedure for the re-taking of a new test, with new test questions.
   c. The number of test failures that constitute a course failure.
   d. Briefing on testing procedures and successful course completion requirements to trainees prior to first test delivery.
