Contra Costa County ($950,000)
The Transitioning Out to Stay Out (TOSO) project will provide Functional Family Therapy to juvenile offenders and their families following an existing program of court-mandated therapy to improve transition from custody to the community. TOSO will be a supplemental layer of service beyond the suite of court-mandated services provided by the County to serious, persistent teenage male offenders and to sexually-exploited/repeat-offending female youth—groups who are at high-risk for re-offense.

Nevada County ($750,000)
The Strengths, Opportunities, and Recidivism Reduction (SOARR) project will provide an intensive wraparound model for treating mental illness, eliminating barriers to recovery, teaching and reinforcing pro-social behaviors, and reducing recidivism. Wraparound services will be provided to the county’s seriously mentally ill youth and their families and to those youth most at risk of an out-of-home placement, such as hospitalization, incarceration, or congregate care. Treatment will be designed to address the therapeutic needs, functional impairments, educational needs, and community resource deficits that frequently result in reoffending.

Riverside County ($948,510)
The Intensive Re-Integration Services (IRIS) project is a collaborative, three-phase approach to support mentally ill juvenile offenders with successful community reentry. The first phase uses intensive in-custody treatment programs targeted towards addressing both significant mental illness and recidivism through multi-modal, evidence-based practices and strategies. The second phase focuses on reentry planning for youth, including appropriate housing, educational services, employment opportunities, job skills training, life skills development, and community reintegration skills. The third phase focuses on community supervision of the youth using either Functional Family Probation or Wraparound.

San Diego County ($950,000)
The Screening, Assessment, and Services for Traumatized (SAST) Mentally Ill Juvenile Offenders project will provide short-term, cost-effective evidence-based interventions that are proven effective for traumatized youth. The SAST project will expand early identification and intervention for high-risk, high-need youth with mental illness and broaden the service continuum to reduce recidivism and improve outcomes by targeting trauma. Youth and their caregivers will receive Trauma Focused Cognitive Behavioral Therapy and Cognitive Processing Therapy, both of which reduces PTSD and depression.

San Joaquin County ($949,073)
The Court for Individualized Treatment for Adolescents (CITA) Juvenile Mental Health Court will provide a specialized treatment model to address the mental health needs of mentally ill juvenile offenders, address the root causes of offending, and will provide a range of supportive services to help youthful offenders and decrease recidivism. The CITA project will include expediting early intervention through the timely screening and
referral of participants, using a dedicated team approach, intensive supervision of participants, and placing the judge at the center of the treatment and supervision process. Interventions include Cognitive Behavioral Interventions (CBI) within the Juvenile Justice Center and in the community, Trauma Focused CBI, Aggression Replacement Training, and CBI for substance use.

Santa Clara County ($946,250)
The Successful Outcomes and Active Reengagement (SOAR) project will implement culturally responsive evidence-based intervention throughout the county juvenile justice system. Components planned that will significantly impact mental health outcomes for youth and involvement with the juvenile justice and dependency systems include training of mental health providers in “El Joven Noble” and “Cara y Corazon” curricula, the addition of a social worker to the Dually Involved Youth Unit, services for commercially sexually exploited (CSE) youth and the formation of a youth advisory council. Project SOAR will allow for more targeted service to CSE youth, who are facing serious emotional and mental illnesses.

Santa Cruz County ($950,000)
The “Familias Unidas En Respecto, Tranquilidad y Esperanza” (FUERTE) project (Families United in Respect, Tranquility, and Hope) will address the individuals’ and families’ therapeutic needs and criminogenic risks in order to reduce recidivism, reduce unnecessary use of detention through community-based alternatives, improve individual functioning, and increase family capacity/skills. The core services provided will be treatment matching through screening and assessments, in-home therapy for the youth and family, intensive case management, and linkages to community-based resources. Additional services may include therapeutic groups addressing aggressive/criminal behaviors and outpatient substance use/co-occurring disorder treatments.

Shasta County ($938,842)
The Wraparound Interagency Network for Growth and Stability (WINGS) is an intensive strength-based family-focused program for high-risk juveniles diagnosed with mental illness. The court-based program uses an interagency family treatment team to meet the needs of the minor and family and establish individualized plans for both. These plans work toward reducing recidivism, minimizing the need for high level, out-of-county placements in group homes, and improve the family’s ability to cope with the minor’s mental health issues. A Deputy Probation Officer, a Social Worker, a Parent Partner, and a Skill Builder along with services provided by a Mental Health Clinician will coordinate treatment through the implementation of evidence-based practices and strategies.

Solano County ($761,322)
The Solano County project will provide early intervention and diversion from formal judicial processing for mentally ill youth in Fairfield. The county’s collaborative plan includes relocation of the Juvenile Probation Supervisor Unit to the Sullivan Center to reduce negative influences when reporting to their Probation Officer and provide for a Group Counselor to coordinate youth care and case management. In addition, funds will be used to train school resource officers and probation officers in the MAYSI-2 assessment tool and provide for a licensed clinician within the Sullivan Center to triage, conduct evaluations and therapeutic interventions, referrals. As part of the full community approach, training will be provided to probation, police, educators, community providers,
and parents on youth brain development, impacts of trauma, and how all youth-serving partners can improve the health and safety of mentally ill minors while promoting alternatives to detention and improving community trust.

Tuolumne County ($262,730)
The Tuolumne County project will work to reduce recidivism and promote academic and behavioral success for its juvenile offender population. Being a rural county, MIOCR funds will provide new options for resource barriers that exist due to the geographic nature of the area. Mental health services for probation youth will be augmented and supported through the collaboration of numerous county entities and the coordination of services. An additional County Therapist position will assist in providing assessments, early intervention modalities such as Cognitive Behavioral Therapy, Functional Family Therapy, and crisis intervention. MIOCR funding will also go toward contracting with a licensed foster family home to provide youth with immediate crisis intervention and stabilization instead of placement in secure detention. An after-school program will be created during high risk crime hours and include a probation aide who will assist with providing youth some of their basic needs, tutoring/mentoring, transportation, group therapy, and, as needed, facilitate medication compliance.

Yolo County ($950,000)
The Yolo County project will expand the county’s current wraparound services to youth involved with the juvenile justice system who have co-occurring mental health and substance abuse diagnoses. The project will coordinate a team using multiple resources, members from various agencies such as social services, behavioral health providers, and justice partners, and most importantly, the family. The wraparound program will coordinate appropriate services to provide treatment for youth and interventions that will improve youth and their family’s functioning across multiple life domains to provide a smooth transition back into the community while reducing the likelihood of recidivism.
