§ 1210. Individualized Treatment Plans.

An emergency is a situation in which action to impose treatment over the inmate's objection is immediately necessary for the preservation of life or the prevention of serious bodily harm to the inmate or others, and it is impracticable to first gain consent. It is not necessary for harm to take place or become unavoidable prior to treatment.

If psychotropic medication is administered during an emergency, such medication shall be only that which is required to treat the emergency condition. The medication shall be prescribed by a physician following a clinical evaluation. The responsible physician shall develop a protocol for the supervision and monitoring of inmates involuntarily receiving psychotropic medication.

Psychotropic medication shall not be administered to an inmate absent an emergency unless the inmate has given his or her informed consent in accordance with Welfare and Institutions Code Section 5326.2, or has been found to lack the capacity to give informed consent consistent with the county's hearing procedures under the Lanterman-Petris-Short Act for handling capacity determinations and subsequent reviews.

There shall be a policy which limits the length of time both voluntary and involuntary psychotropic medications may be administered and a plan of monitoring and re-evaluating all inmates receiving psychotropic medications, including a review of all emergency situations.

The administration of psychotropic medication is not allowed for disciplinary reasons.
