Goals, Objectives, and Outcome Measures FY 2021-22

Goal	Safely return to in-person group treatment services
Objective	Fully re-open the Day Reporting Center (DRC)
Outcome Measure	Delayed reopening due to COVID
Progress toward stated goal	Reopen for in person services at DRC was delayed from February 2022 to September 2022.

Goal	Improve connection to services that help offenders achieve stability.
Objective	Connect offenders to public health, housing, transportation, education, employment and social opportunities
Outcome Measure	Not Applicable
Progress Toward Stated Goal	Probation & Behavioral Health are working with a technical consultant to improve data relevance from measuring outcomes in this area.

Goal	Develop a structure and format for annual data discussions.
Objective	Annual Data presentation to CCP at January Meetings
Outcome Measure	Not Applicable
Progress Toward Stated Goal	New Analyst was hired in January 2022. The New Analyst left in August 2022. Retaining a Department Analyst has been difficult. We have since hired a New Analyst in November. Once Analyst has been in position for a while then data presentations will continue.

Goals, Objectives, and Outcome Measures FY 2022-23

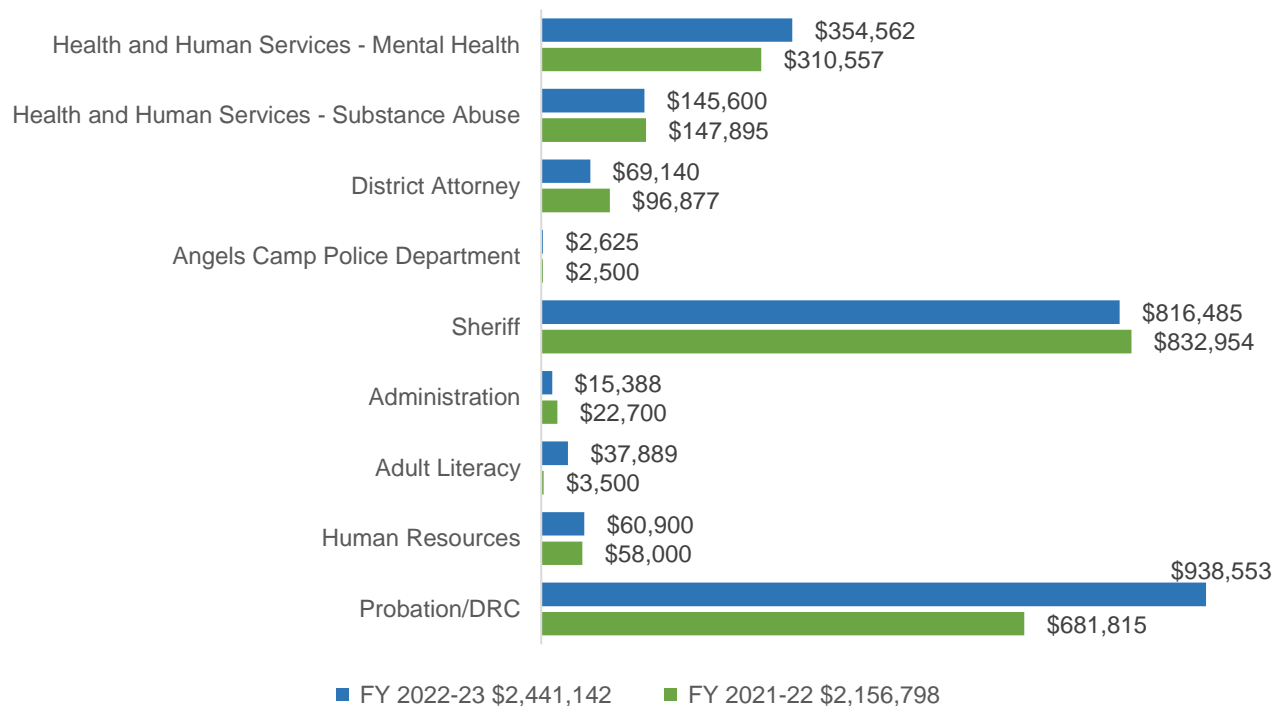

Goal	Restore all Services and Programs that were Reduced During COVID
Objective	Restore Services
Outcome Measure	Not Applicable
Progress toward stated goal	Probation will work to ensure that all pre-pandemic programs and services are fully restored.

Goal	Improve Connection to Services that help offenders achieve stability.
Objective	Connect offenders to public health, housing, transportation, education, employment and social opportunities
Outcome Measure	Not Applicable
Progress Toward Stated Goal	CCP has funded to case manager III positions, and half of their time dedicated towards this objective.

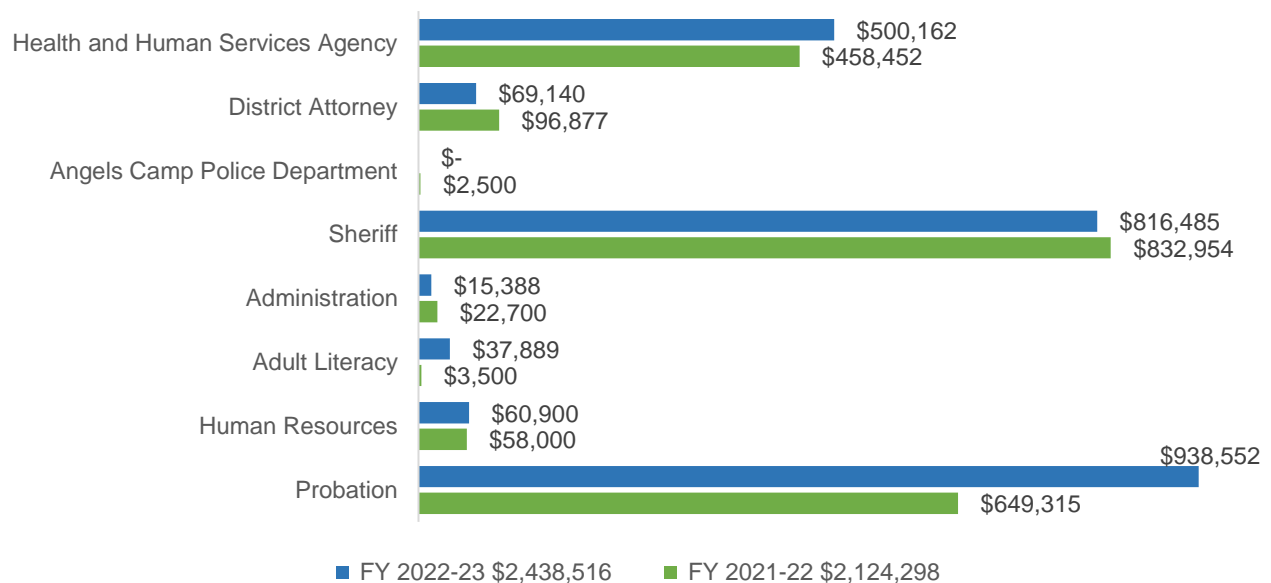

Goal	Develop a Structure and Format for Annual Data Discussions
Outcome Measure	Not Applicable
Progress Toward Stated Goal	We have currently hired a Department Analyst to help track and discuss re-arrest rates, program completions and other important performance measures.

FY 21-22 and 22-23 Allocations

FY 21-22 and 22-23 Allocations to Public Agencies for Programs & Services

FY 21-22 and 22-23 Allocations to Non-Public Agencies for Programs & Services

Optional Questions

Describe the process the CCP uses to determine potential programs and/or services for local implementation using Realignment funds?

Decline to respond

Does the county evaluate the effectiveness (as defined locally) of programs and/or services funded with its Public Safety Realignment allocation?

Yes

If yes, how?

The CCP members are committed to inter-agency data sharing and have an in-house analyst for evaluating program efficiency.

Does the county consider evaluation results when funding programs and/or services?

Yes

If yes, how?

The CCP members use the evaluation results to determine the programs efficiency.

Does the county use BSCC definitions (average daily population, conviction, length of stay, recidivism, and/or treatment program completion rates) when collecting data?

Yes	No	
X		Average daily population
X		Conviction
X		Length of stay
X		Recidivism
X		Treatment program completion rates

What percentage of the Public Safety Realignment allocation is used for evidence-based programming (as defined locally)?

81% or higher

We would like to better understand your county's capacity to offer mental health, substance use disorder, behavioral health treatment programs, and/or other services. What type and level of services are now available?

Decline to respond

What challenges does your county face in meeting these program and service needs?

Decline to respond

What programmatic changes and/or course corrections have you made in the implementation of Public Safety Realignment that you believe other counties would find helpful?

Decline to respond

Describe a local best practice or promising program that has produced positive results. If data exists to support the results, please share.
