## Optional Questions

**Describe the process the CCP uses to determine potential programs and/or services for local implementation using Realignment funds?**

Del Norte CCP continues to have partners bring potential programs and services to the CCP to discuss identifiable needs and the possibility of implementation of new programs or services to meet them.

**Does the county evaluate the effectiveness (as defined locally) of programs and/or services funded with its Public Safety Realignment allocation?**

Yes

**If yes, how?**

The bulk of programs are previously established programs offered by county agencies with existing measures for effective application. For other programs data is being collected to determine effective outcomes. Additionally, agencies are collecting and reporting state-mandated data. A number of these reports, specifically Probation's reports, deal directly with the impacts of SB 678 and AB 109.

**Does the county consider evaluation results when funding programs and/or services?**

Yes

**If yes, how?**

Agencies report outcomes to the body during meetings.

**Does the county use BSCC definitions (average daily population, conviction, length of stay, recidivism, and/or treatment program completion rates) when collecting data?**

Yes	No	
X		Average daily population
X		Conviction
X		Length of stay
X		Recidivism
X		Treatment program completion rates

**What percentage of the Public Safety Realignment allocation is used for evidence-based programming (as defined locally)?**

21% to 40%

**We would like to better understand your county's capacity to offer mental health, substance use disorder, behavioral health treatment programs, and/or other services. What type and level of services are now available?**

The County Behavioral Health Branch continues to offer regular services to the community. Limited staffing is a current hurdle and directly affecting the ability to provide direct services and case management. The County continues to have a difficult time maintaining stable in-county psychologist/psychiatrist services. With limited funding sources available for in-custody behavioral health services, the CCP has agreed to continue funding SUD and mental health services for in-custody populations in county jail. This includes psychiatric services which, in the past, have been extremely hard to secure.

**What challenges does your county face in meeting these program and service needs?**

Del Norte has a very limited CBO presence, particularly in relation to those that offer services to adult offenders. Many local CBOs do not offer offender-specific services. Most direct services are provided by county/governmental organizations.

Additionally, local agencies (both governmental and CBOs) that offer offender services continue to have great difficulty in recruiting and retaining staff due to non-competitive salaries and benefits. This issue has become increasingly pronounced with the economic decline. The rural and isolated nature of the county and the lack of any substantial economic base is severely limiting in developing durable and sustainable solutions for offender rehabilitation.

**What programmatic changes and/or course corrections have you made in the implementation of Public Safety Realignment that you believe other counties would find helpful?**

Decline to respond.

**Describe a local best practice or promising program that has produced positive results. If data exists to support the results, please share.**
