

FY 2022-23 Community Corrections Partnership Survey

Napa County

CCP Membership

Amanda Gibbs Chief Probation Officer	Jennifer Yasumoto Department of Social Services
Cynthia P. Smith Presiding Judge or designee	Cassandra Eslami Department of Mental Health
Brad Wagenknecht County Supervisor or Chief Administrator	Not Applicable Department of Employment
Allison Haley District Attorney	Cassandra Eslami Alcohol and Substance Abuse Programs
Rob Abernethy Public Defender	Barbara Nemko Head of the County Office of Education
Oscar Ortiz Sheriff	Sundy Pech Community-Based Organization
Jennifer Gonzalez Chief of Police	Alejandra Mendieta-Bedolla Victims' Interests

How often does the CCP meet?

Bi-monthly

How often does the Executive Committee of the CCP meet?

Bi-monthly

Does the CCP have subcommittees or working groups?

No

Goals, Objectives, and Outcome Measures

FY 2021-22

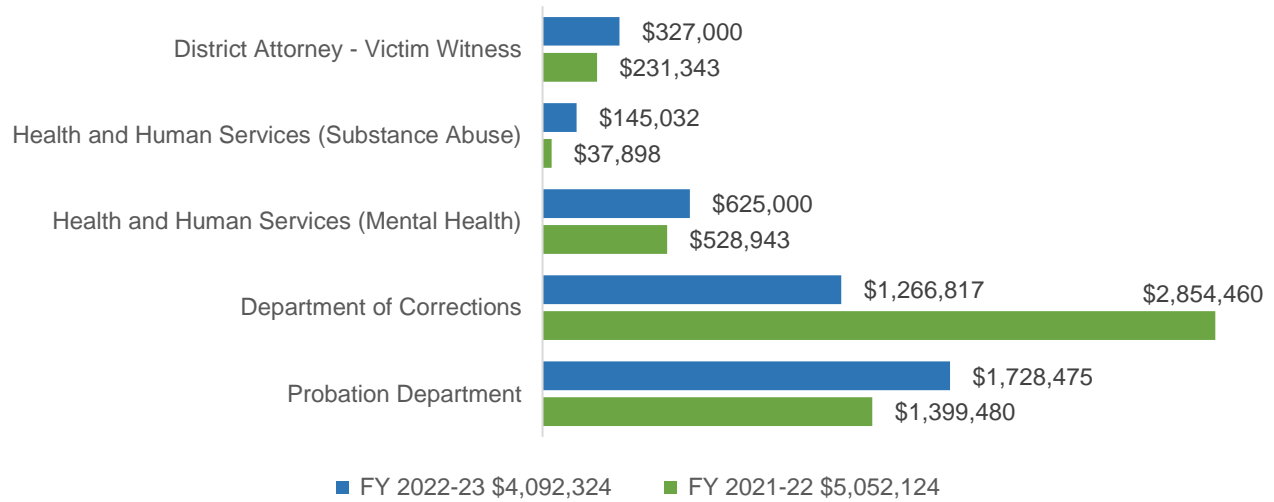

Goal	Successful reentry of clients into the community.
Objective	Use Case Plans to implement client driven Reentry Plans prior to release from custody from jail or prison
Objective	Connect individuals with transitional services that provide community supports and create opportunities for self-sufficiency.
Objective	Utilize Pre-Release Video Conferencing (PRVC) to connect with individuals prior to release from prison.
Outcome Measure	Percent of participants who leave custody with a Reentry Plan.
Outcome Measure	Percent of participants who engage with community services within the first week of their release from custody.
Outcome Measure	Probation Analysts will collect data from Case Reviews to measure outcomes for this objective.
Progress toward stated goal	Due to continued COVID-19 impacts, Napa County Probation Officers have not yet been able to utilize PRVC services. However, Probation Officers have been implementing release planning and case plans for offenders being released from custody including programming to target criminogenic needs and responsivity factors. Progress is being made toward the development of a data warehouse in order to extract and analyze data for outcome measures. However, this process is slow and dependent on external agencies for development.

Goal	Monitor and measure the Probation Department's application of evidence-based practices (EBP) in supervision and case management. Collect and use data to sustain effective practices.
Objective	Provide Departmental and system wide training on current evidence-based practices and programs that reduce recidivism.
Objective	Deliver evidence-based programming and services that are data driven and matched to client risks and needs.
Objective	Measure and assess data and programs, report findings and adjust programs and services to meet fidelity as guided by research.
Outcome Measure	Probation staff and system partners will have knowledge of most current research and information on EBP.
Outcome Measure	Probation staff will provide EBP such as Motivational Interviewing, Case Planning, and Case Reviews to fidelity as demonstrated by internal QA process.
Outcome Measure	Probation will provide accurate and timely data on implementation and adherence to evidence-based practices and programming.
Progress Toward Stated Goal	Napa County has been dedicated to the implementation of evidence-based practices for many years and has been at the forefront of this initiative. Due to several factors including the global pandemic, leadership changes, and data challenges, progress on this goal has been slow. However, progress has been achieved in the area of identifying and contracting with an outside provider who are experts in the field of evidence-based practices to assist with this goal in the coming months.

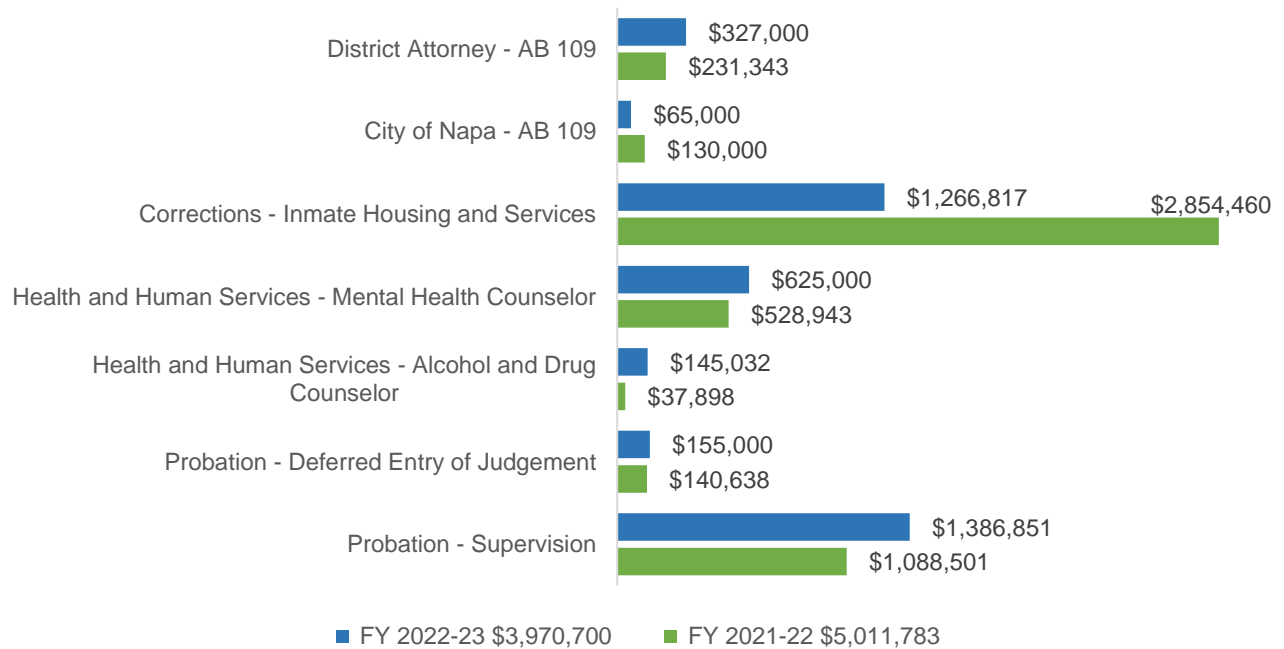

The Napa County CCP reports it will use the same goals, objectives, and outcome measures identified above in FY 2021-22.

FY 2021-2022 and FY 2022-23 Allocation Comparison

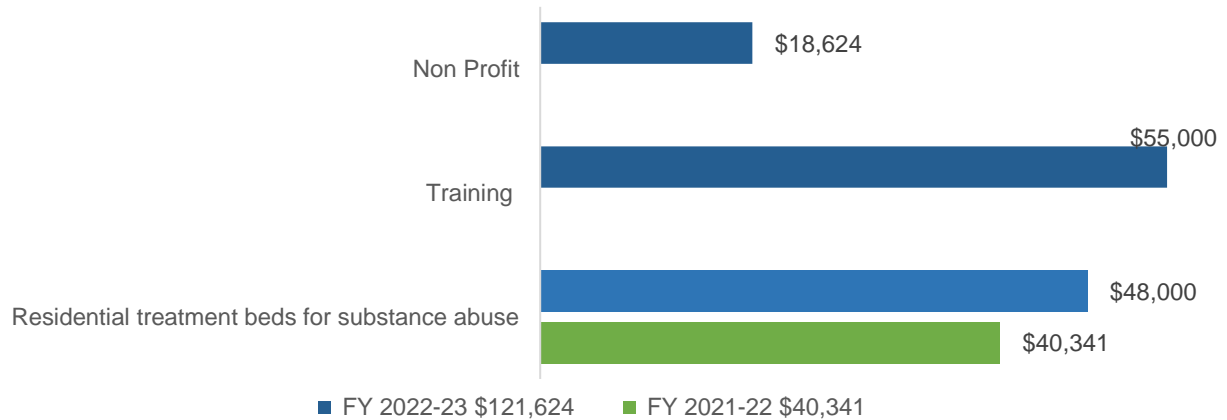

FY 21-22 and 22-23 Allocations

FY 21-22 and 22-23 Allocations to Public Agencies for Programs & Services

FY 21-22 and 22-23 Allocations to Non-Public Agencies for Programs & Services

Optional Questions

Describe the process the CCP uses to determine potential programs and/or services for local implementation using Realignment funds?

New proposals are brought to the full CCP for consideration and discussion. A member of the CCP, a community-based organization, and or justice partner can bring the proposal. Once the discussion is complete, the Executive Committee determines whether a motion will be made to fund the proposal. If the new program or service is approved, it will be submitted to the Board of Supervisors for approval.

Does the county evaluate the effectiveness (as defined locally) of programs and/or services funded with its Public Safety Realignment allocation?

No

If yes, how?

N/A

Does the county consider evaluation results when funding programs and/or services?

No

If yes, how?

N/A

Does the county use BSCC definitions (average daily population, conviction, length of stay, recidivism, and/or treatment program completion rates) when collecting data?

Yes	No	
X		Average daily population
X		Conviction
X		Length of stay
X		Recidivism
X		Treatment program completion rates

What percentage of the Public Safety Realignment allocation is used for evidence-based programming (as defined locally)?

Less than 20%

We would like to better understand your county's capacity to offer mental health, substance use disorder, behavioral health treatment programs, and/or other services. What type and level of services are now available?

Napa County has an embedded Mental Health clinician at Adult Probation and the Public Defender's Office. The clinician at the Probation Department is funded by realignment funding and the clinician at the Public Defender's Office is funded by a grant.

Funding is also used for the Mental Health Clinician in Mental Health Court. Our program can serve up to 15 participants.

Jail Mental Health Services have been expanded to cover from 7:00 am to midnight seven days a week with clinicians paid by realignment funds and county funds through the Corrections Department.

A Drug and Alcohol Counselor is embedded in the Adult Probation Department to offer assessments, triage, and expedite referrals to treatment for both in-custody and out of custody clients.

A Mental Health Counselor is embedded in the Napa Police Department and Sheriff Department through other funding. The CCP voted to expand these services by adding one full time and one part time Mental Health Counselors. Those positions were filled in 2020.

What challenges does your county face in meeting these program and service needs?

Napa County has not been able to start a Mental Health Diversion Program. However, some services are starting to be provided and efforts toward building a formal program have been initiated. This is a need in our community to assist in preventing mental health clients from becoming justice involved. It is anticipated that a program will be available by next year.

Napa has a state hospital in the county that creates a unique challenge. When an arrest occurs at the state hospital, the person may be transferred to the Napa County Detention Center. The jail is not equipped to handle this level of mentally ill offender and there are not

enough hospital beds or psychiatric beds available for inmates who require psychiatric hospitalization.

What programmatic changes and/or course corrections have you made in the implementation of Public Safety Realignment that you believe other counties would find helpful?

Having embedded mental health staff in criminal justice agencies has been beneficial for swift access to services for offenders who need intervention and support. Having the ability to get the substance abuse assessment complete prior to a presentence report has also given the Court better information to make sentencing decisions.

Describe a local best practice or promising program that has produced positive results. If data exists to support the results, please share.

Every Cognitive Behavioral Group run by Probation includes an evaluation by the client. These evaluations provide support that the clients believe their time is well spent in these programs and they received necessary skills and tools to lead more successful lives. Clients frequently self-refer to other groups as they find support and value participating.
