The objective is to divert such individuals from the state hospital system, and restore competency while still remaining in the community. The Behavioral Health Department provides comprehensive services for people enrolled in the program which includes therapy both individual and group, substance use disorder classes, and coordination with the court to ensure success and improve recidivism. Currently Behavioral Health has one individual enrolled in the program.

SECTION 5:  
OPTIONAL  
QUESTIONS

Section 5 asks optional questions about evaluation, data collection, programs and services, and local best practices. There are 9 questions in this section. Responses will be used by the BSCC and its justice-system partners to better understand the needs of counties. If the CCP chooses not to answer an optional question, please respond "Decline to Respond."

---

15. Describe the process the CCP uses to determine potential programs and/or services for local implementation using Realignment funds.

The Tuolumne County CCP currently meets at least quarterly to discuss needs for potential programs and services. Funding requests require the requesting agency to include detailed descriptions of each funding request and how it fits into the AB109 framework, as well as an expense breakdown. Once evaluated by the CCP, Executive Committee members vote on whether or not to adopt the funded program/service. After adoption, the CCP monitors each funded agency's outcomes related to that program/service.

---

16. Does the county evaluate the effectiveness (as defined locally) of programs and/or services funded with its Public Safety Realignment allocation? Check the appropriate answer to the left of the list.

Yes

If "Yes," explain how.

The CCP presents an annual report to the Tuolumne County Board of Supervisors which includes statistics, and year-to-year tracking/trends, and qualitative data. This includes overall success rates of the programs funded by AB109. The Probation Department Business Manager and Staff Services Analyst keep track of AB 109 related statistical and financial data monthly, quarterly, and annually to evaluate overall effectiveness of programs and services and ensure that costs stay within the approved budget.

---

17. Does the county consider evaluation results when funding programs and/or services? Check the appropriate answer to the left of the list.

Yes

If "Yes," explain how.

The CCP gives preference to programs that utilize evidence-based programming and practices as well as promising practices to ensure programs will be a benefit to clients and the County.

---

18. Does the county use BSCC definitions (average daily population, conviction, length of stay, recidivism, and/or treatment program completion rates) when collecting data? <https://www.bscc.ca.gov/wp-content/uploads/AB-1050-Key-Term-Definitions.pdf>  
Check yes or no to the left of each BSCC Definition listed, as applicable.

---

Average Daily Population	Yes
--------------------------	-----

---

Conviction	Yes
------------	-----

---

Length of Stay	Yes
----------------	-----

---

Adult Recidivism	Yes
------------------	-----

---

Treatment Program Completion Rates	Yes
------------------------------------	-----

---

19. What percentage of the Public Safety Realignment allocation is used for evidence-based programming (as defined locally)?  
Check the most appropriate answer to the left of the list of percentages.

---

<p>20. The BSCC would like to better understand the county's capacity to offer mental health, substance use disorder, behavioral health treatment programs, and/or other services. What type and level of services are now available?</p>	<p>The Tuolumne County Behavioral Health Department treats severe and chronically mentally ill clients, as well as provides substance abuse treatment services. The department primarily serves Medi-Cal clients. Tuolumne County as a whole lacks adequate psychiatric treatment and services.</p> <p>Due to the limited behavioral health services available to our rural demographic, the CCP utilizes AB 109 funding to contract with GEO Reentry services for Day Reporting Center (DRC) and Jail Reentry (JRP) programs providing clients with evidence based cognitive behavioral and substance abuse programming, employment assistance, and other resources. GEO Reentry Services also refers clients to the Tuolumne County Behavioral Health Department for more intensive and specialized treatment.</p> <p>Additionally, to close the treatment gaps and services, AB 109 partially funds a full time Behavioral Health Clinician/Worker (assigned to Probation) and a specific line item for housing and residential substance abuse treatment services for actively supervised offenders. Finally, the CCP has authorized funding for Probation to begin providing certain realigned offenders with supportive services such as medical and mental health treatment, housing assistance, transportation, and other assistance to remove any other barriers to successful rehabilitation and reentry into the community.</p>
<p>21. What challenges does the county face in meeting the above program and service needs?</p>	<p>Though Tuolumne County CCP allocations and reserves are healthy, revenue is expected to decrease as we enter a recession. With the current allocation estimates it is projected that the CCP spend more on AB109 related programs and services than annual state and federal revenue provides. Personnel, and program operational costs will continue to rise at a greater rate than revenues overall. The local CCP plan continues to maximize funding for alternatives to secure detention, including electronic monitoring, work release, Mandatory Supervision, and Sheriff's Parole. Local leaders continue to implement strategies emphasizing cost containment without compromising quality programing, however, effectively managing this higher risk population of offenders without relying on secure detention or additional revenue remains challenging.</p>

22. What programmatic changes and/or course corrections has the CPP made in the implementation of Public Safety Realignment that it believes other counties would find helpful?

Previously, on any given day, 60-75% of Tuolumne County's jail population was occupied by inmates who had not yet completed the court process. As a result, inmates were being released early. Beginning in fiscal year 2017-18, Tuolumne County implemented a Pretrial Program to free bed space at the jail for sentenced inmates, and has since adopted a custom tool made up of six different risk factors proven in validation studies to identify risk for new arrest or failure to appear in court. The goal of the Pretrial Program is to ensure the following:

- Safety of the community
- That the released person appears in Court for hearings
- Protect the presumption of innocence
- Maximize the number of jail beds for sentenced inmates

Tuolumne County's Pretrial Program has continually improved over the past several years, and is proving effective in assisting judicial officers and others in making informed decisions by providing information about the likelihood that a person charged with a crime will appear in court and not be re-arrested if released from custody pretrial. The Public Safety Assessment (PSA) helps identify individuals who are more likely to appear for court hearings and to remain arrest free. Those individuals identified as lower risk are generally eligible to be released pretrial.

PSA's are scored by Probation Department staff utilizing static data (prior criminal record, prior failures to appear, and prior incidents of violent crimes) generated from RAP sheets and Probation and Court databases. Assessments completed by Probation staff are sent to the court electronically throughout the day and release decisions are made by Superior Court judges.

Additionally, creating a multi-disciplinary treatment team, along with embedding a Behavioral Health Clinician in the Probation Department, have proven to enhance collaboration with community partners and streamline treatment services to meet individual's diverse mental health and substance abuse needs.

---

23. Describe a local best practice or promising program that has produced positive results. If data exists to support the results, please share.

Tuolumne County continues to contract with GEO Reentry Services to provide evidence-based programming to high risk offenders, both in and out of custody. GEO programming at the Day Reporting Center (DRC) includes individual counseling, group sessions, and Moral Reconciliation Therapy (MRT). This program is very extensive and demanding for clients. In order to successfully complete the program, individuals must complete Phase 1-3, Aftercare, and obtain employment and housing. This can be a minimum of a 210 day program. In order to advance to the next phase, the participant must complete each step listed in their Moral Reconciliation Workbook and remain drug free. In calendar year 2022, Tuolumne County had a 59% success rate, which is highly positive given the difficulty of the program and the type of offenders (typically PRCS and other high-risk classifications). This can be attributed to the collaboration between GEO, Probation, and Sheriff's Office staff.

GEO also provides a similar program in the County Jail. The Jail Re-Entry Program (JRP) provides a 12 week structured, evidence-based program to offenders while incarcerated. The curriculum includes MRT, counseling, education, and release preparation. Successful completion of this program is very similar to the DRC program, as inmates must complete Phase 1-3 of the program. Offenders can then transition into the DRC program after release for further in-depth programming and long-term treatment. The overall success rate of the JRP program is 63%.
