Chris Sachs Chief of Police	Erich Runge Victims' Interests

How often does the CCP meet?

Quarterly

How often does the Executive Committee of the CCP meet?

Other

Does the CCP have subcommittees or working groups

No

Goals, Objectives, and Outcome Measures FY 2021-22

Goal	Reduce Jail Population
Objective	Alternate Sentencing
Outcome Measure	In FY 2021/22, 322 inmates participated in alternative sentencing options to include the Adult Offender Work Program (AOWP), the Sheriff's Work Alternative Program (SWAP) and electronic monitoring.
Progress toward stated goal	Due to the COVID-19 pandemic, Yuba County Jail maintains strict housing restrictions. The jail has a capacity for 432 inmates and currently houses 262 inmates. Jail reduction has been achieved, but not through the outcome measure listed.

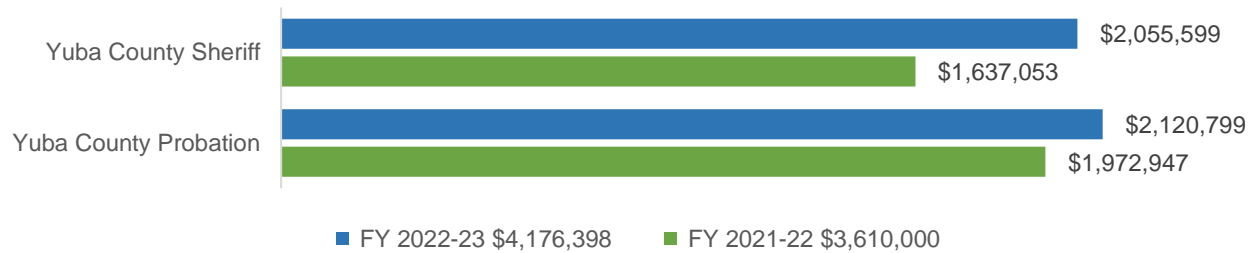

Goal	Maintain TEAM Center
Objective	Provide Evidenced based services to supervised population.
Outcome Measure	639 referrals made for evidenced based programming at our TEAM Center
Progress Toward Stated Goal	639 referrals for programming represents over 104% of the department's supervised population. This factors in the reality of some offenders being referred more than once and/or for multiple programs.

Goal	Maintain Pre-Trial Program
Objective	Release low level offenders pending Court
Objective	Reduce rate of failures to appear
Outcome Measure	Of 440 Pre-trial reports completed, 128 offenders received a release, the majority of those with conditions.
Outcome Measure	Of the 128 offenders released, 37 failed to appear for Court,
Progress toward stated goal	A 29.6% FTA rate is a slight increase from the previous year.

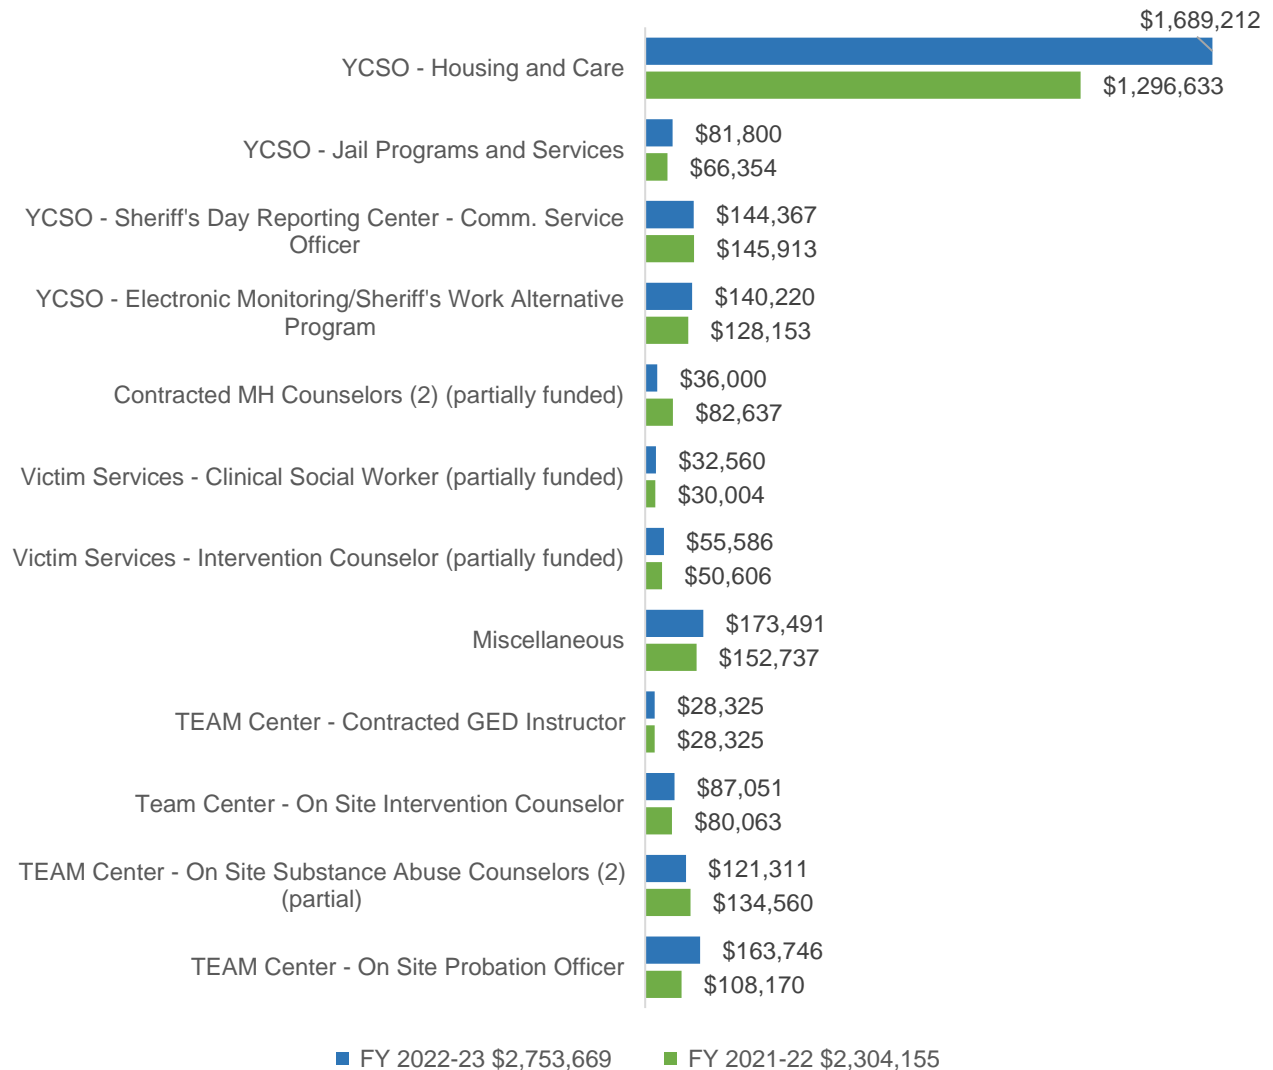

The Yuba County CCP reports it will use the same goals, objectives, and outcome measures identified above in FY 2021-22.

FY 2021-2022 and FY 2022-23 Allocation Comparison

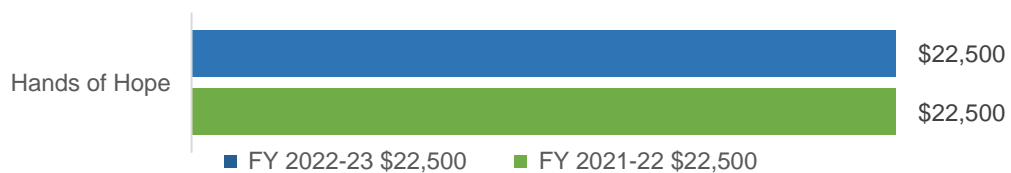

FY 21-22 and 22-23 Allocations

FY 21-22 and 22-23 Allocations to Public Agencies for Programs & Services

FY 21-22 and 22-23 Allocations to Non-Public Agencies for Programs & Services

Optional Questions

Describe the process the CCP uses to determine potential programs and/or services for local implementation using Realignment funds?

Decisions are determined by discussion at quarterly meetings.

Does the county evaluate the effectiveness (as defined locally) of programs and/or services funded with its Public Safety Realignment allocation?

No

If yes, how?

N/A

Does the county consider evaluation results when funding programs and/or services?

No

If yes, how?

N/A

Does the county use BSCC definitions (average daily population, conviction, length of stay, recidivism, and/or treatment program completion rates) when collecting data?

Yes	No	
X		Average daily population
X		Conviction
X		Length of stay
X		Recidivism
X		Treatment program completion rates

What percentage of the Public Safety Realignment allocation is used for evidence-based programming (as defined locally)?

61% to 80%

We would like to better understand your county's capacity to offer mental health, substance use disorder, behavioral health treatment programs, and/or other services. What type and level of services are now available?

Probation has contracted with PeachTree Clinic to provide a mental health therapist stationed at our TEAM Center. This contract also gives our clients access to other services the clinic offers, such as medical, dental and benefit eligibility. We also employ 2 substance abuse counselors stationed at our TEAM Center who conduct both group and individual

counseling with our population. We also employ 3 counselors delivering domestic violence treatment as well as life skills programs to both our and parole's population. We contract with the Yuba County Office of Education to provide on-site services for those seeking their diploma or GED.

What challenges does your county face in meeting these program and service needs?

We desire to expand services offered at our TEAM Center, but face challenges both in terms of funding and lacking space.

What programmatic changes and/or course corrections have you made in the implementation of Public Safety Realignment that you believe other counties would find helpful?

Having mental health counseling readily available to our population within our department has been helpful. It has cut down on the red tape that exists between agencies and offenders have a much higher engagement rate than previously experienced.

Describe a local best practice or promising program that has produced positive results. If data exists to support the results, please share.

See above.
