Hi,

I am an STC provider (Humore.us LLC) and writing to support the short term adjustment to the daily reimbursable rate cap of \$230 for an 8-hour course. This would significantly, but not entirely, close the gap between my market rate for a full-day training. The abolishment of the cap entirely as of July 1, 2027 would be ideal as counties will try and maximize their STC allocation with competitive pricing negotiated directly with the provider. If the cap is not abolished consider a mandatory CPI rate increase annually to allow for inflation.

Thanks!
