## JAIL PROFILE SURVEY

#### **EXPLANATION OF RESULTS**

The following pages contain the Jail Profile Survey results for the third quarter of 2004. Page 1 contains the quarterly totals based upon the monthly and quarterly data submitted to us by the participating jurisdictions. Pages 2 and 3 show the trend data for variables we have been tracking for the last ten years. The remainder of this page provides explanations and clarifications of the data presented.

#### Page 1

- Unless otherwise noted, "projected totals" are based upon the average per day for the variable in question. For example, there was an average of 77,814 inmates per day in local jails (excluding Type I's) during the three-month span of July thru September 2004.
- For some variables (other than ADP), we did not receive complete data from all jurisdictions. In such instances, we used statistical procedures to estimate the statewide total.
- The number for "Bookings" is the average of the monthly totals for July, August, and September.
- For the following variables, the numbers presented are the totals as of the mid-quarter (i.e., August 15, 2004); Pretrial Release, Early Release, 2 and 3 Strikes, Felony Warrants, Misdemeanor Warrants, Juveniles in Custody and Undocumented Aliens.
- Assaults is the total number of serious inmate assaults on staff (resulting in a crime report), statewide, during the third quarter of 2004.

#### Pages 2 and 3

- The data in the 10-Year Summary tables are based upon survey data which the Board has gathered since the early 1980's.
- Prior to 1995, yearly averages were reported to the Board on an annual basis. Yearly averages from 1996 to the present time
  have been the average of the 12 calendar months. In 1995, the yearly figure reported is the fourth quarter average, since we do
  not have data from the first three quarters.

2004	76,030	77,411	77,814		77,088	

The ADP rose to 77,814 inmates in the 3rd Quarter of 2004. This is the highest ADP since the 3rd Quarter of 1998 (79,639), and the 4th highest quarterly ADP in history. Assuming that the 4th Quarter ADP is in the vicinity of 77,000 inmates, 2004 will have the second highest yearly ADP in history (the highest was 79,143 inmates in 1998). We predict that the ADP will continue to rise in the near future corresponding to an upturn in the overall crime rate in California.

#### Non-sentenced ADP

2004	49,876	50,181	51,507		50,525

The non-sentenced male population rose 2% in the 3rd Quarter of 2004 (to 45,092 inmates). The non-sentenced female population rose 5% (to 6,416 inmates). The total increase in non-sentenced ADP was 1,326, compared to a total ADP increase of only 403 inmates (as a result of a reduction in sentenced inmates). The female population has been growing faster than the male population over the past several years. This trend continues.

#### Sentenced ADP

				10 Year	Summary				
1994	1995	1996	1997	1998	1999	2000	2001	2002	2003

2004	26,154	27,230	26,307		26,563

The sentenced male population dropped 3% in the 3rd Quarter of 2004 (to 22,599 inmates). The non-sentenced female population also dropped 3% (to 3,707 inmates). The total decrease in sentenced inmates was 918 inmates. The current sentenced population is about 3,000 inmates lower than it was 20 years ago, which is remarkable when one considers that the overall ADP is about 28,000 inmates higher than it was 20 years ago. The major factor in this trend is jail space. In the 3rd Quarter of 2004, an average of 15,305 individuals were given pretrial release or were released early from their sentences due solely to lack of jail space.

2004	66%	65%	66%		66%

Currently, 66% of the jail population is non-sentenced. Ten years ago, 57% of the jail population was non-sentenced. We expect that the percentage of non-sentenced inmates will continue to rise as jail populations increase and jail capacity remains fairly constant.

#### **Average Number of Persons Booked Per Month**

2004	107,535	106,805	110,075		108,145

In the 3rd Quarter, an average of 110,075 individuals per month were booked. This is the highest average number of bookings for a quarter in over a decade. The number of bookings has recently been going up steadily, consistent with the increase in the overall crime rate in California.

#### **Average Length Of Stay**

				10 Year	Summary				
1994	1995	1996	1997	1998	1999	2000	2001	2002	2003

	2003	20.8	21.6	20.9	18.8	20.5
-	2004	20.8	17.6	20.6		19.7

The two methods we use for measuring the average length of stay have produced similar results. The first estimate results from jurisdictions computing the average length of stay of all inmates released during the quarter. That method indicated the average length of stay for the 3rd Quarter was 20.6 days. The second method is computed by dividing the total bookings for the quarter by the "bed days" (the ADP times the number of days in the quarter). That method produced an average length of stay estimate of 21.7days. Both methods indicate that the average length of stay is declining. In the last half of the 1990s, the average length of stay was in the 23-24 day range.

## Interpretation of Table: JAIL POPULATIONS: 3rd Quarter '03 versus 3rd Quarter '04

#### This table:

- summarizes the ADP results for the 62 jurisdictions in California reporting data from Type II, III, and IV jails;
- summarizes jurisdiction ADP results for the most recent quarter (Column C);
- compares jurisdiction ADP for the most recent quarter with the same quarter last year (Column B):
- ranks the jurisdictions in terms of gains or losses in ADP from high to low (Column D);
- lists the percentage growth or decline in ADP for each jurisdiction (Column E);
- lists the percentage of the overall State increase or decrease in ADP that is represented by each jurisdiction (Column F);
- lists, by jurisdiction, the cumulative percentage increase and decrease in the State ADP starting with the jurisdiction with the highest percentage of the increase and proceeding to the jurisdiction with the highest percentage of the decrease (Column G);
- lists, by jurisdiction, the cumulative total increase and decrease in the State ADP starting with the jurisdiction with the highest increase and proceeding to the jurisdiction with the biggest decrease (Column H); and,
- lists the jurisdictions that experienced decreases in their ADP as shaded.

#### Some important conclusions from this table are:

- 1. The two numbers at the bottom indicate the "total increase" in ADP (in this case 3,189) and "total decrease" in ADP (-664). In other words, the jurisdictions experiencing increases had a total increase of 3,189 ADP; and the jurisdictions experiencing decreases had a total decrease of 664 ADP. Subtracting 664 from 3,189 produces the overall increase of 2,525 between the third quarter of 2003 and the third quarter of 2004.
- 2. The Orange County ADP increase of 780 is 24.5% of the total increase of 3,189. Thirty-nine jurisdictions had increases (down to Siskiyou Sheriff's Department) with 1 jurisdiction reporting no increase (Calaveras Sheriff's Department). When you get to Calaveras Sheriff's Department, you have accounted for 100% of the increases (100% of the cumulative total of 3,189).
- 3. Jurisdictions that experienced a decrease in ADP are listed from smallest decrease to largest decrease (Glenn Sheriff's Department to San Francisco Sheriff's Department). When you get to the bottom of the table, you have accounted for 100% of the total decreases of 664 inmates.
- 4. The cumulative percentage of ADP increase for the top four jurisdictions (Orange Sheriff's Department to Imperial Sheriff's Department) is 49.73%. In other words, four jurisdictions accounted for about 50% of the total ADP increase. Two jurisdictions (Riverside Sheriff's Department and San Francisco Sheriff's Department) account for about 44% of the decreases.
