How to read these tables: The following tables show what counties have missing data reports for the years 2020, 2021, and 2022. X represents one missing data report. The 2020 Total, 2021 Total and 2022 Total columns show a count of the number of missing data reports for each county for each respective year. The Statewide Total row shows how many missing reports there were each month from all counties.

The BSCC makes every effort to collect complete data from each county, but it is ultimately up to the jurisdictions (counties) to report. The BSCC continues to pursue missing data for future reports.
