The California Board of State and Community Corrections provides leadership to the adult and juvenile criminal justice systems, expertise on Public Safety Realignment issues, and offers technical assistance on a wide range of community corrections issues.

The following link outlines a summary of benefits available to state employees: <https://www.calhr.ca.gov/Pages/California-State-Civil-Service-Employee-Benefits-Summary.aspx>

Applications will be screened and only the most qualified will be interviewed. Application must include "to" and "from" employment dates (m/d/y), hours per week, and prior employer contact information including contact number. Applications received without this information may not be considered for this position.

The selected candidate considered for the advertised position will be required to undergo a fingerprint clearance and any offer of employment will be contingent upon live scan fingerprint results.

Scope of Position:

Under the general supervision of the Chief Information Officer (CIO), an Information Technology Supervisor II, the Information Technology Associate functions in the domains of Software Engineering and Business Technology Management. The Information Technology Associate will serve as the Web Services Front-End Developer for the Board of State and Community Corrections. The primary responsibility of the Web Services developer will be the creation, management and maintenance of front-end web interfaces for BSCC's numerous data collection web applications. Additional duties will include the design, development, testing, implementation and ongoing support of enhancements to all those systems and any new development efforts. The IT Associate also supports the BSCC by working with the BSCC business team in the creation and design of web applications, web content and workflows.

Duties and Responsibilities:

(Candidates must perform the following functions with or without reasonable accommodations.)

- **Front-End Web Development** – Work collaboratively with programming staff to architect, design, develop and code front-end web interfaces for the BSCC's data collection and web-applications. Use industry standards such as HTML, CSS, Angular and JavaScript in the development of web interfaces with cross-platform compatibility and usability. Modify existing data collection interfaces as necessary to meet changing business requirements. Incorporate coding and validation mechanisms and processes in front-end web interfaces to ensure data integrity and validity. Develop and enhance technical solutions to meet changing business needs.
- **Website Content Development** – Develop web layout design and content for BSCC's public facing web and intranet site using industry standard web development standards and technologies. Employ industry best practices and State and Department policies and directives throughout the website development process. Ensure all developed web content and formatting are ADA Compliant. Create online surveys and customer contact forms. Create custom workflows within the BSCC intranet to streamline and improve business processes. Assist in posting content to web and intranet site as required.
- **Business Analysis** – The incumbent will be involved in the elicitation and gathering of business requirements for new application development as well as

The State of California is an equal opportunity employer to all, regardless of age, ancestry, color, disability (mental and physical), exercising the right to family care and medical leave, gender, gender expression, gender identity, genetic information, marital status, medical condition, military or veteran status, national origin, political affiliation, hair style and texture, race, religious creed, sex (includes pregnancy, childbirth, breastfeeding and related medical conditions), and sexual orientation. system enhancements. Ensure business needs and application requirements are clearly identified and understood. Document the results of all requirements gathering sessions. The incumbent will prepare technical specifications to meet the business needs of the Board and ensure the organization's customers, stakeholders and business priorities are met while also meeting Federal and State mandated legislation and requirements.

- **Research** – The incumbent keeps current with industry trends, new technologies and industry practices by independently reviewing technical literature, having technical discussions with colleagues and performing independent research.
- **Other Duties** – The incumbent may perform additional IT tasks such as assisting IT staff in the maintenance, patching and updating of Server Software. The Front-end Web developer may be required to install, configure or modify web-related software and content management systems. Additionally, the position may be assigned duties of assisting the IT unit in completing general IT related tasks during system wide upgrades and rollouts.

Desirable Qualifications:

- Excellent communication skills
- Knowledge of Software Development Life Cycle (SDLC)
- Experience with Data Reporting and Analytics
- Development experience with at least one object oriented language
- Knowledge of object oriented concepts
